Claudia Castellucci

VERSO LA SPECIE – Dance at the sunset by Mòra Company

The title contains a choreographic intention: towards the species! That is, to trace and reproduce the emergence of essential and general images, barely defined in order to be distinguished. The rhythmic research draws on the metrics of archaic Greek poetry, from which some feet have been chosen. The animal side of the rhythm, on the other hand, is derived from the movement of horses. Dance is a revelation of individual presence, which stands out from - and thanks to - choral movement. Music is the propulsive origin of this dance, with a composition that has grown together with the movement, step by step.

After the performance is possible to attend a sky observation during a naturalistic walk organised by MUSE Science Museum. Specific booking by calling +39(0)461.270311

A MOVING BORDER - Alpine Cartographies of Climate Change

Drawing on the results of Italian Limes research, the book *A Moving Border - Alpine Cartographies of Climate Change* reflects on how borders are both material and imagined and on the ways in which global warming challenges Western conceptions of territory. It also provides a model for spatial intervention in a world where ecological processes are set to dominate geopolitical issues.

GRAMSCI PICNIC - cuoco Mattia Venco

A picnic on placemats inspired by Antonio Gramsci and created by Chilean artist Alfredo Jaar. Everyone is invited to bring their own picnic-set or eat a Franciscan but delicious menu prepared by chef Mattia. The picnic will take shape and colour in an organic and spontaneous way, just as Gramsci defined the intellectual, and will conclude the week of research of the Little Fun Palace Nomadic School.

Little Fun Palace Nomadic School is a project by **OHT [Office for a Human Theatre]** supported by:
